Hear now. And always

Cochlear®

Hear Your Way

Each patient is unique and their hearing solution should be too. Cochlear is committed to helping you give your patients more wearing options, wireless connections and personalised services so that they can hear their best.

Wear Your Way

A close-up photograph of a woman with long, wavy brown hair smiling warmly at the camera. She is wearing a white tank top and a colorful, beaded necklace. Her right arm is around a young boy with blonde hair, who is looking towards the camera with a neutral expression. The background is a soft-focus green, suggesting an outdoor setting.

“Since having the Kanso, I feel a lot more confident. I’m not self-conscious, and life is easy again. I love everything about it.”

Alison V., Kanso recipient since 2015

Alison V., Cochlear Nucleus Recipient

Cochlear offers the smallest and lightest sound processors on the market.¹

Whether your patients prefer the latest behind-the-ear technology or a discreet off-the-ear sound processor, Cochlear offers a range of solutions.

Nucleus® 7 Sound Processor

The Nucleus 7 Sound Processor offers the latest in behind-the-ear comfort and performance.

Being 25% smaller and 24% lighter than its predecessor¹, the Nucleus 7 Sound Processor provides a more comfortable experience for even the smallest ears. And thanks to new chip technology, your patients can have up to 50% more battery life² and enjoy a longer active day.*

Smaller¹

Lighter¹

More battery life²

Hybrid™ Hearing

The Nucleus 7 Sound Processor is also Hybrid™ ready, which means your patients can combine the benefits of their natural hearing with a cochlear implant to experience even better hearing performance in difficult situations.³

Nucleus Kanso® Sound Processor

Nucleus Kanso® is an off-the-ear hearing solution that's so discreet it's barely noticeable and so small and comfortable your patients will forget they're wearing it.

Designed to fit snugly against the head for comfort and security, the Nucleus Kanso is the smallest and lightest off-the-ear cochlear implant sound processor available.¹

Wear Your Way

Maneh, Cochlear Nucleus Recipient

There are wearing and retention options to suit every patient's lifestyle.

Adventure-proof solutions

Whether a child is swimming, riding their bike or playing at the park with their friends, your paediatric patients can have access to durable and child-friendly products and accessories that keep up with their adventures as they play and grow.

Nucleus 7 Sound Processor

Designed for active lifestyles and to provide extra security, the Nucleus 7 Sound Processor offers a selection of retention accessories, such as the Hugfit™ for small ears, the Snugfit or the Safety Cord.

Nucleus Kanso Sound Processor

Nucleus Kanso comes in eight colours so that your patients can choose the shade that best matches their hair or skin colour. For extra security and peace of mind, a headband is also available to retain the sound processor comfortably.

Nucleus Aqua+

So your patients can enjoy their favourite water activities with confidence, both the Nucleus 7 and Nucleus Kanso Sound Processors are splashproof.^{4,5} And when worn with the Aqua+ accessory, both processors become waterproof with IP68 rating.^{6,7}

Hear Your Way

Mattias B., Cochlear Nucleus Recipient

Cochlear leads the way with proven innovations to help your patients hear their best.

Hearing in noise is the most challenging listening situation for any individual. Cochlear's industry leading technology, SmartSound® iQ with SCAN, seamlessly combines multiple sound algorithms to help patients hear their best by automatically and continually monitoring their environment.⁸

Cochlear's Nucleus Sound Processors also come equipped with dual microphone technology, to help filter out background noise so your patients can hear more of what matters.⁹

Available exclusively for the Nucleus 7 Sound Processor, ForwardFocus is a clinician-enabled, user-activated control feature which provides an added hearing benefit in challenging listening situations. It attenuates noise coming from behind your patient, offering an average 2.9dB improvement in speech recognition threshold (SRT).¹⁰

SmartSound iQ with SCAN technology:

Speech in noise: For conversations in noisy surroundings like a city street or a busy café.

Speech: Helps your patients hear speech more clearly, so they won't miss out on important information.

Noise: Hear comfortably in noisy situations, such as at a sports game, or while at the train station or airport.

Wind: Hear comfortably in windy conditions.

Quiet: Appreciate soft sounds in quiet environments.

Music: Enjoy listening to the music they love.

Hear Your Way

Alexa and Kevin U., Cochlear Nucleus Recipients

When your patient chooses a Cochlear implant, you can be confident that they are choosing the most reliable implant available.¹¹

Most reliable

With over 450,000 recipients and over 300,000 registered Cochlear Nucleus implants worldwide¹¹, Cochlear is the most chosen and most trusted cochlear implant brand. We meet and report against the independent global standards for implant reliability¹²⁻¹⁴ and publish data of every implant generation, past and present.¹¹ This information is available to surgeons and audiologists around the world.

1 **Implant reliability**
The Nucleus Profile Series implant has a 99.82% CSP* within five years.¹¹

Designed for performance

Cochlear has designed a comprehensive range of electrodes to assist with a wide variety of patient conditions, optimise hearing outcomes, and support a variety of surgical techniques.¹⁵

Designed for simpler MRI

With the Nucleus Profile Plus Series Implant your patients have access to pain-free¹⁶, more convenient MRI scans at 1.5 and 3.0 Tesla without the need for magnet removal.

Cochlear was the first to introduce removable implant magnets nearly two decades ago. If magnet removal is necessary to avoid image artefact, or if an alternative test is not an option, you can feel confident that the Profile Plus Series Implant is designed to make this as swift and straightforward as possible.

* CSP is Cumulative Survival Percentage.*

Connect Your Way

A photograph of two young girls, likely of Asian descent, sitting together and looking at a red tablet device. The girl on the left is smiling broadly and holding a large, grey, plush koala toy. The girl on the right has dark hair styled in braids and is also smiling. Both girls appear to be wearing hearing aids or cochlear implants. They are sitting on a bed with colorful bedding.

Alexa U., Cochlear Nucleus Recipient

Your patients can connect to the people they love and the world around them, with Cochlear's exclusive technology.

The Nucleus 7 Sound Processor is the world's first and only cochlear implant sound processor offering direct streaming from a compatible smartphone.¹⁸

Your patients can effortlessly stream phone calls, video, music and entertainment directly to their Nucleus 7 Sound Processor.

Direct streaming to both ears

For a richer hearing experience, bimodal or bilateral patients can now control and stream sound directly to both ears from their compatible Apple or Android device.*

In a recent clinical trial:

88%

of users were satisfied or very satisfied with their ability to talk on the phone with family and friends using the Nucleus 7 Sound Processor.¹⁷

80%

of users rated music to be more enjoyable with the Nucleus 7 Sound Processor compared to their own processor.¹⁷

* With compatible ReSound hearing aids. A list of compatible hearing aids is available online at: www.cochlear.com/nucleus/compatibility

Connect Your Way

A photograph showing a man and a woman sitting at a table, engaged in a conversation or meeting. The man, on the right, is smiling and looking towards the woman. He has short brown hair and a beard. The woman, on the left, is also smiling and looking at him. She has blonde hair tied back and is wearing a light-colored ribbed sweater. They are both holding pens and writing in notebooks. The background shows a window with a view of a cloudy sky.

I feel a lot more confident because the clarity of the sound is fantastic.

Karl K., Cochlear Nucleus Recipient

Karl K., Cochlear Nucleus Recipient

First for iPhone. First for Android™.

The Nucleus 7 Sound Processor offers world-first connectivity and control via the Nucleus Smart App. Your patients can use their compatible Apple or Android device to:

1. Control and adjust their settings

Your patients can use mySmartSound™ to control their bass, treble and master volume limit to fine-tune their listening experience wherever they may be.

2. Track their hearing progress

For the first time, patients can access their personalised hearing data through the Hearing Tracker. They can review data such as number of coil offs and time in speech, giving them greater involvement in their hearing journey.

3. Find a missing sound processor

If your patients ever lose their Nucleus 7 Sound Processor, the 'Find my Processor' feature can easily help them locate it.

In a recent clinical trial:

90%

of users found it more convenient to control the Nucleus 7 Sound Processor with Nucleus Smart App.^{17*}

[Download on the App Store](#) [GET IT ON Google Play](#)

Timesaver Tip:

Save time for you and your patients by asking them to download the Nucleus Smart App before their activation. This will give them the opportunity to become familiar with the app and allow you to focus on program fitting and counselling.

* Compared with using a remote control.

ConnectYourWay™

A young girl with dark hair and a pink headband is smiling broadly. She has a cochlear implant visible on her left ear. She is wearing a white ruffled top and a gold sequined belt. She is sitting at a table, playing with colorful clay. In the background, there is a window showing a brick wall and some greenery.

Justin P., Cochlear Nucleus Recipient

The Cochlear True Wireless™ range is designed to take your patient's hearing to the next level in challenging listening environments.

The Nucleus 7 and Nucleus Kanso Sound Processors establish a clear and secure connection to Cochlear True Wireless devices without the interference, signal drops or additional weight of neck-loops or FM systems.

Cochlear Wireless Mini Microphones

Whether at work, school or home, Cochlear Wireless Mini Microphones help your patients hear better over distance and in noisy situations – so they can hear their best in any environment.

Cochlear Wireless TV Streamer

With the Cochlear Wireless TV Streamer, your patients can stream sound directly to their sound processor to enjoy their favourite TV show or video game without needing to adjust the volume or rely on captions.

Cochlear Wireless Phone Clip

The Cochlear Wireless Phone Clip streams conversation and music from the patient's mobile phone or Bluetooth® compatible device directly to the sound processor with industry-leading sound quality and performance²⁰, and reliable hands-free connectivity.

A recent clinical trial has shown:

8 dB improvement
in hearing over distance with noise using
the Mini Microphone.²⁰

* The Nucleus 7 and Nucleus Kanso Sound Processors are both compatible with Cochlear's True Wireless™ range.

Care Your Way

Colleen P., Audiologist

Tools and resources to help your patients optimise their hearing performance.

Support during surgery

Cochlear's CR220 Intraoperative Remote Assistant is a handheld device, enabling wireless and computer-free key intraoperative test measurements to be performed in the operating theatre.

Coupled with the CR220 Data Viewer, results can be easily and instantly transferred directly from the surgery to the audiology centre, which means you can spend less time waiting and more time caring for your patients.

Comfortable and convenient fitting

The Cochlear Wireless Programming Pod is the first Bluetooth® enabled programming interface for cochlear implants.²¹ Attaching directly to the sound processor, it offers a cable-free, clutter-free experience, allowing you to interact with your patient in a more natural way. With a new touch interface for Windows®-based tablets, the Nucleus Fitting Software is operated by swipe gestures, letting you focus on important behavioural cues without needing to divide your attention between the screen and your patient.

Care Your Way

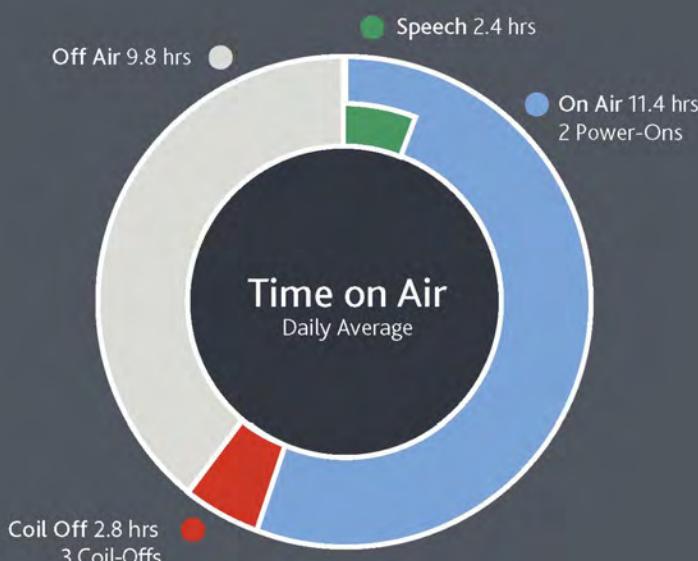

David W., Cochlear Nucleus Recipient

Services and support to simplify your daily activities and keep you at the cutting edge of innovation.

Greater insight. Tailored care

Data logging is a feature that provides you with valuable, evidence-based feedback about your patients' listening environment and device usage. With the most comprehensive suite of datalogs available²², you can gain the insights you need to help your patients achieve optimal hearing outcomes.²³

The Hearing Tracker

For patients who are interested in tracking their hearing performance, their coil offs and 'time in speech' are reported through the Hearing Tracker in the Nucleus Smart App, empowering patients to actively engage in their hearing journey.

Care Your Way

Diane M., Cochlear Nucleus Recipient

Cochlear is the global leader in implantable hearing solutions.

Resources for you

As a clinician, you want to be doing what you love – caring for patients. That's why we've introduced Cochlear Link – a secure service that delivers automatic device registration and enhanced service and support for your patients.

Cochlear also organises a wide range of training courses for professionals in the field of cochlear implants, bone conduction implants and bone anchored prosthetics to ensure that you are receiving the latest in product and technology innovations.

Resources for your patients

Almost 40 years after successfully launching the world's first multichannel cochlear implant, our commitment to innovation and providing hearing remains unchanged.

We have provided more than 550,000 implantable devices to people all over the world so you can feel confident that Cochlear is here to support you as you counsel your patients.

* Not all programmes available in every country. Speak to your Cochlear representative about the services that are available in your region.
