Course description

Over the past two decades, there has been a dramatic evolution in the way in which septal perforation with endoscopic techniques are approached and managed. This course represents a current state of the art in septal perforation repair. During one complete day, delegates will practice all different approaches to repair septal perforation under supervision. The **Thieme book on “Nasoseptal perforation”** will be delivered for free to each delegate.

COURSE OBJECTIVES

The course objectives are:

- To review the endoscopic anatomy of the nose and sinuses.
- To review the blood supply of nasal septum and lateral nasal wall.
- To provide the opportunity to improve the skills handling endoscopes and instruments in the nose and to learn, step-by-step, the endoscopic surgery of the nasal cavity and sinuses.
- To harvest all kind of intranasal pedicled flaps.
- To learn decision-making in the management of septal perforation repair.
- A stepwise surgical approach to repair septal defects in FRESH cadaver.

Friday 13/04/2018

- 7:30 Registration
- 8:00 Welcome and Introduction
- 8:15 Handling of endoscope and camera
- 8:30 Identification of anatomical landmarks of the nose and sinuses. Nasal blood supply
- 9:00 Approach to the sphenopalatine and maxillary artery
- 10:00 Nasal floor and inferior meatus flap

11:00 Coffee break

11:30: Anterior ethmoidal artery flap

13:00 Lunch

14:00 Lateral nasal wall flap

15:30 Bilateral Cross-Over flap

16:30 Coffee break

17:00: Middle turbinate flap

18:00 Pericranial flap

19:00 Adjourn
