Live International Otolaryngology Network

Course description & objective

The objective of this course is to continuously set standards in postgraduate medical education in otology and to foster the sharing of surgical expertise in a worldwide network of healthcare professionals to improve patient care in middle ear surgery.

This three-day course is designed to present and teach all essential operative procedures in surgery for otosclerosis, ossicular reconstruction, CSOM with and without cholesteatoma and implantable hearing devices.

Each session will include a step by step description of various surgical approaches and techniques used by the faculty who will share their expertise. Surgical indications, pre- and postoperative care will also be discussed allowing for active participation of the audience.
